

## **WUGAS Endorses product to help Members control Cyber Slacking and the risks that go along with it.**

Covina, CA - The Western Users Group of Applied Systems (WUGAS) formally announces the endorsement and recommendation of the iPrevision™ internet security & employee monitoring solutions for their members.

“We have used the iPrevision™ solution for almost a year now here at Partee Insurance Associates and believe it is a tool that would be a great value for our WUGAS Members. After discussing it with the WUGAS Board of Directors, the Board has decided to put our name behind this very valuable product” says current WUGAS President, Kelley Young.

“Whether it’s 50% of employees who receive and circulate inappropriate material using the office network, the 10% who use the network to download illegal music, or the 26% of IT employees who have admitted to distributing confidential information outside the company, you’re seeing a new set of risks agencies need to protect themselves from,” said Corey Woinarowicz, Dir. Business Development for iPrevision™.

This single box solution provides on-demand, real-time reporting on Internet, Instant Messaging, SMTP Email and Web Mail usage. “Agency managers can see a list of all the websites visited in a designated time period—ranging from the most frequently hit sites—which we hope will be insurance related—to the least frequently hit,” said Woinarowicz. “If they choose, owners can click on the questionable sites and see the users who visited those sites. They can also get a list of users who are most active on the Web during certain periods”.

“Our company has more than one location and only one manager to oversee all employees. It is reassuring to know that one person does not have to be in all places, at all times to ensure employee compliance with company policies. The service provided by iPrevision™ has been excellent. Their product has proven to be very valuable and is well worth the investment” says Sharyn Maldonado, current WUGAS Member and iPrevision™ client.

iPrevision’s Panoptech has been successfully used by companies of all sizes since 2001. Now, with about 10,000 actively monitored insurance agency users, it is clear that iPrevision™ is the leader in the insurance agency space. “We are very proud to receive The Western Users Group of Applied Systems Endorsed Product designation and, we are looking forward to working with the Group’s members” Woinarowicz said.

WUGAS members who are interested in finding out more about iPrevision™ should first go to the company website to schedule a real-time online demo to get a good idea of how it all works. After receiving the order—at the special 10% price discount—agents will have the product in as few as two business days.

For more information about iPrevision™, or to see a real-time demonstration, visit [www.iprevision.net](http://www.iprevision.net). Please choose the “WUGAS’ Group” option from the “how did you hear about us” drop down box to take advantage of special pricing.
